## Emergent BioSolutions Continues to Broaden Access, Awareness and Availability of NARCAN® Nasal Spray to Help Save Lives from the Ongoing Opioid Crisis

March 28, 2024

- As the first-ever U.S. Food and Drug Administration (FDA) approved over-the-counter (OTC) naloxone in 2023, Emergent is working to expand access with NARCAN® Nasal Spray and build on its longstanding efforts with public interest entities across the country
- Hundreds of thousands of NARCAN® Nasal Spray cartons are available in over 32,000 retail locations in the U.S., and Emergent is working to increase reach into workplaces, businesses and other locations
- Approximately 22 million doses of NARCAN® Nasal Spray were distributed in the U.S. and Canada in 2023, and Emergent is committed to meeting any increase in demand driven by the evolving and worsening epidemic
- The recently announced 'White House Challenge to Save Lives from Overdose' is a nationwide call-to-action that includes increasing access to life-saving opioid overdose reversal medications, a program with direct alignment to Emergent's strategy and efforts since the launch of NARCAN® Nasal Spray in 2016
- Naloxone, the active ingredient in NARCAN® Nasal Spray, is a life-saving medication that can reverse an overdose from opioids, including heroin, fentanyl, and prescription opioid medications, when given in time

GAITHERSBURG, Md., March 28, 2024 (GLOBE NEWSWIRE) -- Emergent BioSolutions Inc. (NYSE: EBS) remains committed to fighting the ongoing opioid crisis by broadening access to, and awareness of, NARCAN® Nasal Spray to help save lives in opioid overdose emergencies. In 2022, the U.S. Centers for Disease Control and Prevention (CDC) reported over 107,000 overdose deaths – a number that has risen almost every year and which has continued to break annual records.<sup>1</sup> This includes a rise in synthetic opioid overdoses mainly driven by fentanyl.<sup>1</sup> There is an inherent risk of potential overdose, wherever opioids are present, which has tragically become the leading cause of accidental death in the U.S.<sup>2</sup> These statistics only further underscore the need for multi-sectoral action to address and prevent opioid overdose deaths.

One year after Emergent obtained the [historic OTC U.S. FDA approval](#) in March 2023 and seven months since [retail launch](#) in August 2023, the availability of NARCAN® Nasal Spray in pharmacies, grocery stores and online retailers has helped more people gain access to this life-saving product. Emergent and other stakeholders in the fight must continue raising awareness about the availability of products like NARCAN® Nasal Spray, reducing stigma and further improving access for all Americans. Since the OTC launch, NARCAN® Nasal Spray can be purchased at more than 32,000 mass drug, grocery, online retailers and e-commerce sites. Emergent is working with retail partners to make it easy to find and access, however each retailer ultimately determines in-store product placement.

In 2023, Emergent distributed approximately 22 million doses (~11 million two-dose cartons) in the U.S. and Canada through public interest organizations like state and harm reduction groups and retail locations. Emergent also [announced a shelf-life extension](#) from 36 to 48 months for NARCAN® Nasal Spray in the U.S., further demonstrating its commitment to ensuring more medicine is available for the public to access.

"We're living in a time when one person dies approximately every six minutes from an accidental opioid overdose – prevention and response efforts require an all-hands on deck approach toward lessening this devastating public health crisis," said Joseph Papa, president and CEO of Emergent. "In my first month leading Emergent, and alongside our dedicated colleagues, we continue to advance our mission to protect the public from threats such as the opioid epidemic and am proud of our efforts to help save lives."

Emergent is now engaging with partners who are aligned with its mission to expand access, awareness and availability, such as the [National Safety Council \(NSC\\*\)](#), working together to educate and reach businesses and employers. Specifically, Emergent sees brick and mortar stores, airlines, restaurants, hotels and schools as critical locations where NARCAN® Nasal Spray should be made available in case of an emergency, alongside AED kits.

"We know that NARCAN® Nasal Spray alone can't solve the opioid crisis – and that opioid overdose reversal medication can only be useful if present and administered when a person is experiencing an overdose. When bystanders are unable to provide life-saving measures such as naloxone in nearly half of fatal overdoses, our role to help expand the reach of this medication has never been more important," said Paul Williams, senior vice president, products business, Emergent. "That's why we remain committed to increasing awareness of NARCAN® Nasal Spray availability. We also applaud the Biden Administration for their recently announced plan to address the opioid crisis, and Emergent remains prepared to support efforts to our fullest capacity and help save more lives."

Emergent is also maintaining affordability of NARCAN® Nasal Spray and is ready to meet public need as necessary and arm individuals with an essential tool to combat against opioid overdose. As announced at the OTC retail launch last year, the Manufacturer's Suggested Retail Price of NARCAN® Nasal Spray is \$44.99 per two-dose carton, which is equivalent to roughly \$22.50 per dose. While Emergent works with partners to help maintain access and affordability, the price of the product is set by individual retailers. Emergent set the public interest price at \$41.00 per two-dose carton, building on its long-standing engagement with public interest groups to ensure naloxone is readily available to at-risk communities.

In addition, Emergent continues to prioritize efforts to reduce the barriers to access, including addressing stigma, encouraging businesses and school districts to carry naloxone, supporting policy to ensure Health Spending Account (HSA) and Flexible Saving Account (FSA) eligibility for naloxone and working with state Medicaid agencies to provide coverage.

NARCAN<sup>®</sup> Nasal Spray is an appropriate choice for a known or suspected opioid overdose as immediate administration, however it is not a substitute for emergency assistance. To learn more about this life-saving medicine and access resources, education and advocacy tools, visit [NARCAN.com](https://www.narcancan.com).

\*As a contracted commercial partner of Emergent, NSC will receive a fee for service.

### **About NARCAN<sup>®</sup> Nasal Spray**
