

## Emergent BioSolutions Receives Approval from Singapore Health Sciences Authority for Expanded Indication of ACAM2000® (Smallpox and Mpox (Vaccinia) Vaccine, Live) to Include Mpox

April 30, 2026

GAITHERSBURG, Md., April 30, 2026 (GLOBE NEWSWIRE) -- Emergent BioSolutions Inc. (NYSE: EBS) today announced that Singapore's Health Sciences Authority (HSA) has approved an expanded indication for ACAM2000® (Smallpox and Mpox (Vaccinia) Vaccine, Live) to include prevention of mpox disease in adults determined to be at high risk for mpox infection.

The expanded indication in Singapore is supported by existing human safety data and data from a well-controlled animal study in which ACAM2000® vaccine was shown to be effective in protecting against mpox virus exposure. This regulatory milestone expands the authorized use of ACAM2000® in Singapore to support public health preparedness and response efforts.

"The Singapore HSA approval of ACAM2000® for immunization against mpox in high-risk individuals demonstrates the strength and breadth of Emergent's medical countermeasures portfolio," said Simon Lowry, chief medical officer of Emergent. "We are committed to working with international regulatory authorities as part of our broader vision to become the leader in delivering protective and life-saving solutions to communities around the world."

ACAM2000® is a single-dose vaccine administered percutaneously via a bifurcated needle dipped into the vaccine solution and used to prick the skin several times in the upper arm with a droplet of the vaccine. The vaccine was first approved by the HSA in 2009 for active immunization for the prevention of smallpox disease in individuals determined to be at high risk for smallpox infection. With this expanded indication, the vaccine is now also approved for active immunization for the prevention of mpox disease in adults determined to be at high risk for mpox infection, for use during mpox outbreaks associated with severe or life-threatening disease where alternative vaccines are unavailable or contraindicated. Mpox is an infectious disease endemic to central and west Africa caused by the double-stranded DNA mpox virus.

### About ACAM2000® (Smallpox and Mpox (Vaccinia) Vaccine, Live)

#### US FDA-Approved Indication and Important Safety Information

##### Indication

ACAM2000® is indicated for active immunization for the prevention of smallpox and mpox disease in individuals determined to be at high risk for smallpox and mpox infection.

##### Select Important Safety Information

##### Warning: Serious Complications

Myocarditis and pericarditis (suspect cases observed at a rate of 5.7 per 1000 primary vaccinees (95% CI: 1.9-13.3)), encephalitis, encephalomyelitis, encephalopathy, progressive vaccinia, generalized vaccinia, severe vaccinia skin infections, erythema multiforme major (including STEVENS-JOHNSON SYNDROME), eczema vaccinatum resulting in permanent sequelae or death, accidental eye infection (ocular vaccinia) which can cause ocular complications that may lead to blindness, and fetal death, have occurred following either primary vaccination or revaccination with ACAM2000® or other live vaccinia virus vaccines that were used historically. These risks are increased in certain individuals and may result in severe disability, permanent neurological sequelae and/or death.

**Contraindications:** Do not administer ACAM2000® to individuals with severe immunodeficiency. These individuals may include persons who are undergoing bone marrow transplantation or persons with primary or acquired immunodeficiency states who require isolation.

**Warnings & Precautions:** Myocarditis and/or pericarditis, ischemic heart disease and non-ischemic dilated cardiomyopathy; encephalitis, encephalomyelitis, encephalopathy, progressive vaccinia (vaccinia necrosum), generalized vaccinia, severe vaccinia skin infections, erythema multiforme major (including Stevens-Johnson syndrome), eczema vaccinatum, fetal vaccinia, and fetal death; accidental eye infection (ocular vaccinia) that may lead to blindness.

**Adverse Reactions:** Inoculation site signs and symptoms, lymphadenitis, and constitutional symptoms, such as malaise, fatigue, fever, myalgia, and headache.

To report Suspected Adverse Reactions, contact Emergent BioSolutions at 1-877-246-8472 (U.S.), 1-800-768-2304 (Canada), or [medicalinformation@ebsi.com](mailto:medicalinformation@ebsi.com); or VAERS at 1-800-822-7967 and <https://vaers.hhs.gov>.
