

Emergent Revises Upward 2010 Financial Forecast

July 20, 2010

- **Company anticipates total revenues of \$275 to \$300 million and net income of \$40 to \$50 million**

ROCKVILLE, Md., Jul 20, 2010 (BUSINESS WIRE) --

Emergent BioSolutions Inc. (NYSE:EBS) announced today that it is revising upwards its 2010 annual guidance to now reflect anticipated total revenues of \$275 to \$300 million and net income of \$40 to \$50 million. Of the anticipated total revenues of \$275 to \$300 million, \$165 to \$190 million is expected to be recognized in the second half of 2010. This revised forecast does not reflect or incorporate any revenue impact from a possible development contract for the company's rPA vaccine candidate.

The revision to the 2010 financial forecast is supported primarily by the recent modification to the company's current BioThrax^(R) procurement contract with the US Centers for Disease Control and Prevention (CDC). This contract modification increased the number of doses of BioThrax that the company can deliver into the Strategic National Stockpile (SNS) during calendar 2010. This increased volume of available doses of BioThrax is due to consistently high production yields throughout 2010.

"This modification by the CDC to our existing BioThrax procurement contract reinforces, yet again, the US government's commitment to BioThrax as a critical component of the Strategic National Stockpile and to our nation's defense against bioterrorism," said Fuad El-Hibri, chairman and chief executive officer of Emergent. "This is another example of how we continue to work with our US government partners in establishing BioThrax as the backbone of our readiness against the threat of anthrax and to building a stockpile as rapidly as possible."

Daniel J. Abdun-Nabi, president and chief operating officer of Emergent, also commented, "The production yields we have been experiencing are a direct result of our commitment to driving innovation in our manufacturing process and to a multi-year initiative focused on process optimization of the existing Building 12 production facility. We are extremely pleased with the results of our continuous process improvement program for BioThrax and expect this program to drive the maintenance of positive production metrics going forward."

About Emergent BioSolutions Inc.

Emergent BioSolutions Inc. is a biopharmaceutical company focused on the development, manufacture and commercialization of vaccines and antibody therapies that assist the body's immune system to prevent or treat disease. Emergent's marketed product, BioThrax^(R) (Anthrax Vaccine Adsorbed), is the only vaccine approved by the U.S. Food and Drug Administration for the prevention of anthrax infection. Emergent's product pipeline targets infectious diseases and includes programs focused on anthrax, tuberculosis, typhoid, flu and chlamydia. Additional information may be found at www.emergentbiosolutions.com.

About BioThrax^(R)

BioThrax is the only FDA-licensed vaccine for the prevention of anthrax infection. It is indicated for the active immunization of adults who are at high risk of exposure to anthrax. BioThrax is manufactured from a culture filtrate, made from a non-virulent strain of *Bacillus anthracis*. Since 1998, the U.S. government has procured over 45 million doses of BioThrax. During that time period, more than 9.6 million doses have been administered to nearly 2.4 million military personnel.
